Education

International Institute of Information Technology, Bangalore (IIIT-B) <i>Master of Science in Digital Society</i>	July 2022 – July 2024 3.28 CGPA
National Institute of Speech and Hearing (NISH), Trivandrum <i>Bachelor of Science in Computer Science (HI)</i>	September 2017 – May 2021 87 Percentage
St. Sebastian's Higher Secondary School, KERALA <i>Plus Two/12th Grade</i>	May 2016 – March 2017 74 Percentage

Experience

CloudStorey <i>Trainee Software Engineer GPT, Claude, Gemini, GitHub Copilot</i>	January 2026 Remote Work
- Orchestrated the development of high-performance backend modules in Rust and Go by leveraging agentic AI to solve for memory safety and concurrency, ensuring enterprise-grade stability. - Directed AI-driven code generation to implement complex system requirements (Goroutines, Rust Borrow Checker) in languages outside of core stack, achieving a production-ready state in less than 30 days. - Managed an 'AI-as-a-Service' development flow, utilizing LLMs to research and implement optimal tech stacks (Rust/Go/Supabase) based on project performance requirements rather than personal syntax familiarity.	
DeepVisionTech.AI <i>Full-Stack/LLM/Research (Intern) Python, Gen AI, Node.js, Vue.js</i>	July 2025 - December 2025 Bengaluru, Karnataka
- Developed a news scraper application to provide the marketing team with targeted industry insights on digital accessibility trends. - Researched and integrated emerging AI technologies, including Speech-to-Text (STT) and Generative AI (LLMs), to enhance application accessibility and user experience. - Designed and prototyped an accessible kiosk application, incorporating WCAG-compliant features for public use.	
IIITB - Centre For Accessibility In The Global South (CAGS) <i>Research Analyst Intern MS Excel, Google Scholar</i>	January 2024 – June 2024 Bengaluru, Karnataka
- Co-spearheaded the full-scale research project of "Android as Assistive Technology," designing accessibility solutions that improved digital interaction for users with disabilities - Conducted structured interviews with 20+ diverse participants, gathering critical first-hand insights on user experience and accessibility challenges. - Authored detailed research report documenting methodologies, findings, and evidence-based recommendations that influenced institutional accessibility guidelines - Developed comprehensive mixed-methods analysis framework, synthesizing qualitative feedback with quantitative metrics to identify key accessibility pain points and opportunities	
Société Générale <i>Software Engineer Intern React, SpringBoot</i>	September 2021 – April 2022 Bengaluru, Karnataka
- Engineered and deployed a backend application that streamlined internal processes, resulting in 25% reduction in processing time. - Collaborated with cross-functional teams in an Agile environment, participating in daily stand-ups, sprint planning, and retrospectives to ensure timely delivery of high-priority features.	

Projects

Android as Assisstive Technology (Pilot Study) Qualtrics	December 2023
- Designed and contributed to comprehensive pilot study that validated research methodology and refined protocols for full-scale investigation of Android accessibility features. - Developed targeted survey with 15+ specialized questions to capture nuanced user experiences with assistive technologies. - Conducted observational analysis of 8 participants interacting with smartphone accessibility features, identifying 5 critical usability patterns.	

Skills

Programming Languages: Python, HTML, CSS, JavaScript
Technologies/Frameworks: Windows, GitHub, Figma, Vue.js Node.js, HuggingFace, Google Cloud Platform, MS Excel, Agentic Coding
Soft Skills: Adaptability, Problem solving, Teamwork
